Internal Implant System

One implant delivering complete surgical & prosthetic versatility
It’s time to start asking more from your implant company

- Esthetic gold-hued 3inOne Abutment lowers overhead and helps increase productivity.

- Secure connection ensured by 1.5mm deep internal hex, lead-in bevel and Spiralock® screw technology.

- Simple Solutions™ Abutments available for SnapCap restorative ease

- Surgical Kit also places BioHorizons Single-stage implants for maximum flexibility

- Implants and prosthetics are color-code matched for failsafe component mating.
