Patients see their problems clearly and comfortably without the doctor resorting to awkward hand gestures and elaborate verbal descriptions that may confuse the patient. Patients recognize their doctor’s expertise and problem-solving skills through the interactive co-discovery process. The doctor can demonstrate treatment solutions in sequence. Practice will see a dramatic increase in case acceptance and office productivity. Easily integrated into existing technology—no need for expensive digital upgrades.

XCPT...Building Trust Through Innovative Visual Communication

XCPT founder, Steven J. Feldman, D.D.S., has used the XCPT method with great success for many years, realizing a steady increase in patient acceptance and productivity. He developed XCPT software to offer dental professionals the opportunity to clearly and easily educate their patients about treatment options using a highly visual approach.
